ILEARN might be tested grades 3-8, but success depends greatly on foundational literacy and numeracy skills developed in grades K-2. Join us as we clarify which reading, writing, and math skills are needed to create a solid foundation for grades 3-8.

Workshop Agenda

- Clarify role of K-2 teachers to build readers and writers
- Dive into best math practices for K-2 foundations
- Explore John Hattie's research on 3 levels of learning: surface, deep and transfer
- Better understand what is required of students 3-8 on ILEARN and what K-2 teachers can do to support this

Register

Carrie Rosebrock, CIESC Professional Learning Specialist

- Former ELA teacher and curriculum administrator
- Current presenter for effective ELA strategies K-12
- School consultant on ELA best practices

Laurie Ferry, CIESC Professional Learning Director

- Former math teacher and school administrator
- Current presenter for effective Math strategies, K-12
- School consultant on math best practices
